

“SMART GRIDS AND SMART CITIES” INTERNATIONAL SUMMER SCHOOL 6-8 June 2017 - Barcelona

DAY 1: SMART GRIDS

WELCOME CEREMONY AND INTRODUCTION

Marc Ternisien, Laboratoire LAPLACE - Université Toulouse III - Paul Sabatier.

Marc Ternisien was born the 11th of February in Boulogne Sur Mer (France). He's got a Master Degree in Lasers, Metrology and Telecommunications from the University of Paris XIII and the Conservatoire National des Arts et Métiers. He defended his PhD thesis in Micro and Nanotechnology in 2008 at the University of Lille I. In September 2009, he joined the Toulouse Paul Sabatier University as an Associate Professor in the “Lumière et Matière” team lead by the Professor Georges Zissis. After his PhD thesis concerning the influence of Self Assembled Monolayers on the interface between the gate dielectric and the organic semi-conductor in Organic Field Effect Transistors, he's now interested in the interface problems in Organic Light Emitting Diodes and their influence on the performance of these devices but also the realization of OLETs (Organic Light Emittig Transistors).
